

First Aid Kit Checklist

This checklist is designed to help food businesses ensure they have a properly stocked, food-safe compliant first aid kit on the premises. A well-equipped first aid kit is essential for providing immediate care in case of minor injuries or illnesses.

Question	Yes	No	Notes/Action
Is there a clearly labeled, easily accessible first aid kit on the premises?			
Does the first aid kit contain a first aid guidance leaflet or manual?			
Are there adhesive bandages (plasters) of various sizes in the kit?			
Does the kit include sterile gauze pads in medium (12x12cm) and large (18x18cm) sizes?			
Are there triangular bandages in the kit?			
Does the kit contain eye dressings or eye pads?			
Are there conforming bandages (7.5cm) in the kit?			
Does the kit include sterile cleansing wipes or solution?			
Is there adhesive tape (2.5cm) in the kit?			
Does the kit contain disposable nitrile gloves (pairs)?			
Are there finger dressings or finger bandages in the kit?			
Does the kit include emergency foil blankets?			
Are there burn dressings (10x10cm) in the kit?			
Does the kit contain scissors or clothing cutters?			
Are there conforming bandages (5cm) in the kit?			
Does the kit include a sterile eyewash solution?			
Are there instant cold packs in the kit?			
Does the kit contain tweezers?			
Are there disposable CPR face shields or a pocket mask in the kit?			

Question	Yes	No	Notes/Action
Are the contents of the first aid kit regularly checked for expiration dates and restocked as needed?			
Have relevant staff members been trained on the location and proper use of the first aid kit?
